E-mail: chris@ironbrush.com

Hi! I am a multi-talented professional from Lincoln, NE that is currently working toward a career in Web Development. I am applying for your *Junior Developer* position and after reading a little about Silverback Strategies, I am really excited about your company and I believe this would be great for me as a fresh developer. I am so excited to keep moving forward and learn and your company seems like the perfect fit!

My experiences so far have allowed me to work with HTML5, CSS3, Javascript, GIT, VS Code, Github and the Command Line. I also do have some basic experience with Wordpress, Drupal and React. Additionally I have formal education in Videography, Editing, VFX and Photography/Photo Editing. With experience in both designing and building websites, I can bring a lot to the table for UI/UX and beyond.

My years as a manager and an event planner gave me experience organizing both projects and people in a professional setting. Additionaly, customer service has been a large part of my life and has allowed me to garner much experience with a wide range of clients as well as a diverse group of co-workers. Listening to your clients as well as your team is a vital step in making the best possible project come to life. That being said, I am most at home working with others and communicating in a team setting.

I continually work to gain more knowledge and be more proficient every day in both the design and creative world, as well as my other hobbies and interests. I love to work hard and help a company achieve their goals and execute their vision.

My Specialties: HTML5, CSS, Javascript, GIT/Github, Adobe Creative Suite, Canon Cameras, Rhode and Zune Audio Equipment.

Thank You For Your Consideration!
